Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/735,451	Applicant(s) FUERST ET AL.	
	Examiner Mathieu D. Vargot	Art Unit 1732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simpson et al 2002/0090725 (see paragraphs 10-12), either alone, or further in view of Burgess et al (see claim 36 therein).

The applied reference discloses the basic claimed process of creating a biomedical product by electrospinning a (collagen) polymer in a solvent to form a biomedical structure, Simpson et al essentially lacking a disclosure that the biomedical structure would be a contact lens. However, given the teachings of what the structure would be—ie, see paragraph 12—it is respectfully submitted that the making of a contact lens would have been an obvious feature in the process of Simpson et al in that one of ordinary skill in the art would almost readily envision that such a product would have been made from the process of Simpson et al. Hence, the instant claims are considered to be obvious over the applied reference. Reference that equate, or consider equivalent products, biomedical implants and devices disclosed in Simpson et al with contact lenses are notoriously well known in this art and applicant should doubtless be aware of them. At any rate, Burgess et al has been additionally applied to show this. The instant Holey fiber is well known and would have been an obvious substitution for the nozzles of Simpson et al. Simpson et al provides the instant Taylor cone during the spinning, such being nothing but conventional in the art.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaiani, can be reached on 571 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
